Blood Bank of San Bernardino-Riverside Counties

Blood Bank of San Bernardino-Riverside Counties
The Blood Bank of San Bernardino-Riverside Counties drew its first donor on June 9, 1951. Developed by the two County Medical Societies on the strength of contributions from member physicians. The Bank has grown parallel to the expanding population of the two counties and the 29 hospitals it serves. During 1982 the Bank opened its fourth fixed drawing facility, fixed facilities accounting for approximately 64% of all blood drawn. The Bank serves its community not only as its sole blood supplier, but as an educational and reference center as well, administering an SBB program, educational seminars and reference and HLA laboratories.

Community Blood Bank Center, Inc.

Community Blood Bank Center, Inc.
The Community Blood Bank was incorporated in 1973 to serve six desert communities. Donor stations were established in each hospital. Desert Hospital in Palm Springs provided space until the need for expansion. The Eisenhower Medical Center in Rancho Mirage donated land for the building of a free-standing central facility and provided temporary space during construction. In 1977 the facility was completed through the generous donation of the Western Italian Golf Association, Bob Hope Classic and others. In November 1981, the John R. Clark, Jr. Immunohematology Wing was completed and the Blood Bank now offers a complete blood banking service, including apheresis and transfusion service.

Houchin Community Blood Bank

Houchin Community Blood Bank
Houchin Community Blood Bank began operation April 1951, serving the entire county of Kern. The original facility, equipment and supplies were donated by Elmer Houchin. The Blood Bank began operation drawing approximately 200 units per month and has grown to a current usage of 1,500 units per month. It is continuing to serve the same area population and the same 12 hospitals. Moving into a new facility in May 1981, the Blood Bank tripled the size of its operation and is at the present time capable of extending its boundaries to take in those areas which are in need.

Sacramento Medical Foundation Blood Bank

Sacramento Medical Foundation Blood Bank
The Sacramento Medical Foundation Blood Bank, a nonprofit corporation, was organized by the Sacramento Medical Society and began operation as a self-supporting community blood bank on November 2, 1948. Originally conceived to provide blood banking services only to Sacramento County, the Sacramento Blood Bank now provides total blood banking services to 40 hospitals within an 11-county area of Northern California. Because of the expanded service area, a second facility, the Chico Donor Center, Chico, California, was opened in July 1962, under the sponsorship of the Butte-Glenn Counties Medical Society.

Belle Bonfils Memorial Blood Center

Belle Bonfils Memorial Blood Center
The Belle Bonfils Memorial Blood Center was officially opened February 27, 1942. In December 1945, it was reorganized and incorporated. In September 1945, it was designated the official blood bank of the Colorado State Medical Society. A small grant from Helen C. Bonfils made the establishment of the Center in memory of her mother, Belle Bonfils. It is nonprofit, self-supporting and the only community blood center in Denver and Colorado. Its set of basic goals are supply, quality, accessibility and efficiency. It provides and supplements service to 42 hospitals in Denver and the state of Colorado.

Blood Bank of Delaware, Inc.

Blood Bank of Delaware, Inc.
Blood Bank of Delaware was established as a donor scheduling/blood assurance program in 1955. In 1977, the organization became a full-service community blood bank serving 14 institutions in the state of Delaware and northeast Maryland. In addition to those donors drawn by Blood Bank of Delaware the organization schedules donors for an additional 10,000 units drawn by Wilmington Medical Center. The region's needs for 1982 required over 32,000 units drawn.

Civitan Regional Blood Center, Inc.

Civitan Regional Blood Center, Inc.
Civitan Regional Blood Center, Inc. opened its doors on August 28, 1974. The Blood Center was sponsored by the Gainesville Civitan Club in extension of an ongoing program to help hemophiliacs. The Club's goal was to service the area hospitals with blood products and services. In a brief period of less than eight years, the Civitan Regional Blood Center has become one of the largest blood drawing centers in Florida, serving a nine-county area. Fifteen members of the Civitan Club signed a $50,000 loan to pay for equipment and operating expenses. The opening day donor draw was 34 units. For the coming year the Blood Center plans to draw over 26,000 units of blood to produce more than 60,000 blood products.

Community Blood Bank, Inc.

Community Blood Bank, Inc.
The Community Blood Bank, Inc. was established in St. Petersburg, FL, November 27, 1952, by a group of local business and civic leaders with the endorsements of the St. Petersburg Times and the Pinellas County Medical Society. In November, 1977, the first branch was opened by the Blood Bank in Pinellas Park. The Blood Bank relocated in a new facility in March, 1980, and currently supplies service to 12 hospitals in Lower Pinellas County.

Edison Regional Blood Center, Inc.

Edison Regional Blood Center, Inc.
The Edison Regional Blood Center, Inc. drew its first volunteer blood donor on June 3, 1974. The Blood Center was established to meet the blood needs of a rapidly growing, multi-hospital community. By 1982, three satellite offices and a mobile operation were assisting in volunteer blood collection in the area. Edison Regional Blood Center started construction on a new building on January 24, 1983. This facility is located at 3714 Evans Avenue, Fort Myers, FL 33901. At the present time, the ERBC is servicing five hospitals and two kidney dialysis centers in Southwest Florida.

Jacksonville Blood Bank, Inc.

Jacksonville Blood Bank, Inc.
The Jacksonville Blood Bank began receiving donors on October 27, 1942. The JBB was started by the Duval County-Jacksonville Defense Council to support the military and civilian population during the war effort. Since the time of its founding, the JBB, a nonprofit organization, has provided all of the blood and related services to all of the hospitals in the Jacksonville area. In addition, the JBB also provides blood for hospitals in seven other counties. The JBB draws approximately 35,000 units of blood per year.

South Florida Blood Service, Inc.

South Florida Blood Service, Inc.
The South Florida Blood Service is the oldest nonprofit community blood service in the nation, with more that 40 years of service. It was established at the beginning of World War II to serve the local community and assist armed forces overseas. After the war it turned its efforts to the improvement of health care in Dade, Broward and Monroe counties. For many years, the Blood Service was known by the name of its early director, John Elliott. In 1981, the name was changed to South Florida Blood Service to reflect more accurately the regional nature and full scope of its many services.

BLOOD IS LIFE®

Southwest Florida Blood Bank, Inc.
The Blood Bank was established in 1942 during a wartime emergency at the request of the National Office of Civilian Defense. During that time, it provided for the needs of wounded servicemen overseas. Following the war, the Blood Bank continued to perform a vital service by furnishing the blood needs of patients in Hillsborough County, Florida. Today, 14 hospitals and clinics are served by approximately 55,000 units of blood and blood components — supported by a centralized crossmatching service operating 24 hours a day. Blood is collected by means of portable and mobile donor collection vehicles, or at any of five permanent donor locations.

St. John's County Blood Bank

St. John's County Blood Bank, Inc.
Established in 1949, the St. John's County Blood Bank, Inc., is a nonprofit organization. Orginally blood was provided by the Jacksonville Blood Bank, but in 1950 the St. John's County Blood Bank was able to draw and process enough blood to meet the needs of the community. After 31 years in rent-free space provided by the City of St. Augustine, the Blood Bank moved at the end of 1982 to a larger leased building. Long-range plans call for the building of a permanent, free-standing facility in close proximity to the hospitals served.

Walter L. Shepeard Community Blood Center, Inc.

Walter L. Shepeard Community Blood Center, Inc.
The Blood Center opened in October, 1978, as a nonprofit corporation to serve area hospitals which supported its establishment. The Center relies solely on voluntarily donated blood to meet the needs of hospital patients. During 1982, the Center purchased property and began construction of a new 11,200 square foot facility, which is scheduled for completion in July 1983.

Aurora Area Blood Bank

Aurora Area Blood Bank
The Aurora Area Blood Bank and Donor Society was incorporated in 1943 to serve the hospitals in Aurora. The Aurora Area Blood Bank has since grown to be a full service blood center providing all the blood needs for the patients in 22 hospitals west and south of Chicago. It has three subcenters in addition to the main center in Aurora. In 1981 the Aurora Area Blood Bank staff of 100 employees collected and processed over 51,000 units of blood.

Central Indiana Regional Blood Center

Central Indiana Regional Blood Center
The organization began in 1952 as the Community Blood Bank of Marion County, Inc., a 501(c)(3), not-for-profit, tax exempt corporation formed by pathologists and hospital administrators to serve as a clearinghouse for blood movement among the hospitals in Indianapolis. In 1964, we began actively recruiting blood donors and in 1973, because of added responsibilities, became known as the Central Indiana Regional Blood Center. Today we provide blood services to 37 hospitals in 25 counties.

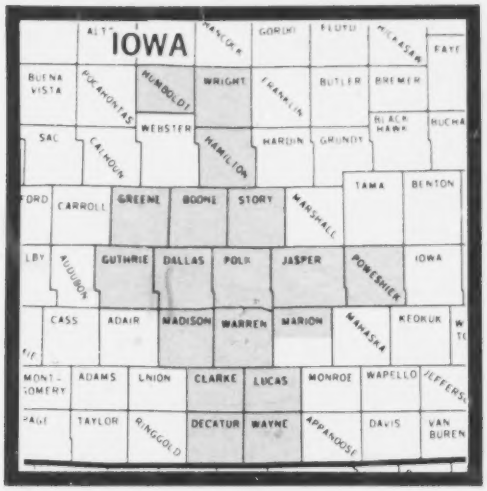
The Blood Center of Central Iowa



The Blood Center of Central Iowa
The Blood Center of Central Iowa was established in 1963 as the Community Blood Bank of Central Iowa by a group of Des Moines hospitals. The Center has grown from providing service to five Des Moines area hospitals to providing service to 25 hospitals in central Iowa. The Blood Center has been operating under the community responsibility concept since 1976, when the replacement fee was dropped. A new 17,000 square foot facility was constructed in 1981. At the time the name was changed to The Blood Center of Central Iowa to more accurately reflect the range of service being provided.

Central Kentucky Blood Center, Inc.

Central Kentucky Blood Center, Inc.
The need for a regional system to supply and distribute blood was addressed in 1968 by members of the Fayette County Medical Society which established Central Kentucky Blood Center (CKBC) and pledged funds sufficient to underwrite the first year of operation. Initially, the Center supplied only hospitals in Fayette County. Today, the Center has evolved into a regional organization providing a full range of service to 38 hospitals in 43 Central and Eastern Kentucky counties. Headquartered in Lexington, CKBC has two remote drawing stations in Somerset (September, 1979) and Prestonsburg (July, 1980).

Hattiesburg Community Blood Center, Inc.

Hattiesburg Community Blood Center, Inc.
The Hattiesburg Community Blood Center began operations in Hattiesburg, Mississippi, February 16, 1953. The Blood Center was organized by the local physicians of the Hattiesburg Clinical Society in the name of the Blood Bank of the Hattiesburg Clinical Society, Inc. A name change was necessary in 1979 at the time that the Hattiesburg Clinical Society disbanded. The new name became the Hattiesburg Community Blood Center governed by the medical staffs and serving the two local hospitals, Forrest General Hospital and the Methodist Hospital.

Community Blood Center of Greater Kansas City

Community Blood Center of Greater Kansas City
Community Blood Center of Greater Kansas City was founded April 3, 1958, based upon comprehensive recommendation made by the Institute for Community Studies. Headquartered in Kansas City, Missouri, the Center also operates four bloodmobile units and a collection facility in St. Joseph, Missouri. Today the Center meets the total blood needs of 69 hospitals in a 40-county region. Other services offered include compatibility testing, antibody identification, a coagulation reference laboratory, outpatient and research departments, a hemophiliac home care treatment program, pheresis collections and educational programs for the medical community and general public.

Research Projects
Research projects are conducted on an ongoing, departmental basis at the Center. A 69-hospital service area places Community Blood Center in a unique position to identify and pursue research topics. The cooperative relationship between the Center, regional hospitals and area universities and colleges assures an efficient mechanism for data gathering.

The Center's virus research team has been studying cytomegalovirus (CMV) and how it affects blood donations and transfusions in immunosuppressed patients and premature babies. The research department is developing tests for antibodies on red blood cell function; development of improved collection equipment; laboratory analysis of samples, iron studies; development of cost-effective testing methods, such as microtiter testing; and inexpensive vegetable and animal sources of testing sera. Other projects include purification of Rh (D) antigen from human red blood cells, and use of pure D antigen to make Rh immune globulin; diagnosis of multiple sclerosis by testing red blood cells; the effects of plasma exchange in different disorders and the maintenance of coagulation factors in these patients; the recovery and purification of coagulation factors from routine blood collections and from single donor automated machine plasmapheresis.

Community Blood Bank of the Lancaster County Medical Society

Community Blood Bank of the Lancaster County Medical Society
Community Blood Bank of the Lancaster County Medical Society was incorporated as a nonprofit organization in 1968. Total blood service for the community of Lincoln, NE, provided by volunteer donors was the goal and continues to be the primary objective of the blood center. Centralized recruitment, collection, processing and distribution along with other blood center functions has increased the size of the operation. In 1975 the Blood Bank moved into a new facility and is currently discussing an expansion program. In the 1980s the Community Blood Bank looks to continued growth and increased demand for its services.

Hoxworth Blood Center of the University of Cincinnati

Hoxworth Blood Center of the University of Cincinnati
The Hoxworth Blood Center was founded December 10, 1938, by Dr. Paul I. Hoxworth. It is the oldest community blood center in the country, now serving 27 hospitals in an eight-county region of Ohio and Kentucky. During the first year of operation, the community blood needs totaled less than 2,500 units. This year, over 75,000 units of blood will be needed for our area patients.

Northern Ohio Red Cross Blood Services

American Red Cross

Northern Ohio Red Cross Blood Services
The Northern Ohio Red Cross Blood Services was established in 1951 to serve an area of 15 counties approximately 3-¾ million people. Initially, the Red Cross Center provided approximately 50% of the blood needs in Cleveland hospitals and 100% outside of Cleveland with commercial banks providing the balance. Today, the Northern Ohio Red Cross Blood Services supplies 93% of the blood for Cleveland hospitals plus 100% of components for 40 regional hospitals. The region is supplied completely with blood from volunteer donors. The Northern Ohio Red Cross Blood Services offers a complete range of blood products and services, such as reference lab, parentage testing, HLA lab, an SBB program and numerous other educational offerings. The Blood Center is dedicated to serving all the transfusion needs of Northern Ohioians in accordance with the highest blood banking standards.

Sylvan N. Goldman Center
Oklahoma Blood Institute

Sylvan N. Goldman Center
Oklahoma Blood Institute
At its foundation as a nonprofit, regional blood center in 1977, the Oklahoma Blood Institute (OBI) pledged itself to serve the expancing needs of the 10-county area through four goals: the maintenance of adequate blood supply, the availability of specialized medical services, the advancement of community and professional medical education, and the continuance of blood-related research. The need for blood and blood services in the state is staggering. Each year OBI provides over 200,000 units of blood and blood components, such as plasma, red cells, white cells and platelets, for 41 Oklahoma hospitals from Enid in the north to Ardmore in the South. Up to 250 volunteer blood donors are needed each day to assure an adequate supply of blood to area patients.

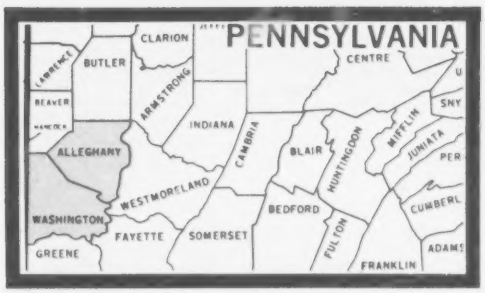
Central Blood Bank of Pittsburgh



Central Blood Bank
Central Blood Bank was incorporated on November 2, 1950, by the Pittsburgh Jaycees through a grant from A.W. Mellon Educational and Charitable Trust under non-profit corporation law of Pennsylvania. Operations began the following year at Falk Clinic in Oakland. In planning for community blood needs, two locations were ideal — the present donor center at 812 5th Avenue, opened in 1968, and in 1970, the Outpatient/Medical/Research Center Complex at 203 DeSoto Street. A satellite donor station Central Blood Bank of Washington, Pennsylvania, was opened in 1977 and in 1982 another satellite donor station was opened at Allegheny General Hospital. Central Blood Bank supplies blood and blood products to 34 participating hospitals in two counties.

Central Pennsylvania Blood Bank

Central Pennsylvania Blood Bank
The Central Pennsylvania Blood Bank is primarily a dry blood bank. We are responsible for 100% of the blood supply, 24 hours a day, 365 days per year. However, this is done primarily by sending donors to our member hospitals on an as-needed basis. All donations at member hospitals become part of our master computerized donor call file which is produced by blood type in order of date of donation. Each member hospital is inventoried twice daily and an anticipated outdate for the next eight days is obtained. Based upon this information, donors are sent to specific hospitals for specific inventory needs, or blood is moved from one institution to another. We are also responsible for recruitment of all blood donors for the area.

Samuel W. Miller Memorial Blood Center

Samuel W. Miller Memorial Blood Center
Samuel W. Miller Memorial Blood Center was established in September, 1971, to service six hospitals in the two-county Lehigh Valley area. It is a subsidiary of Hospital Central Services, Inc., a shared services corporation. During the following ten years it added a reference laboratory and a frozen blood program and participates in teaching programs at the local community college. The Center is also involved in continuing education programs in our service area and beyond. The Center now provides total blood service to eight hospitals in the two counties and part of a third.

Rhode Island Blood Center

Rhode Island Blood Center
The Rhode Island Blood Center was established May 1, 1979, by the hospitals of Rhode Island as a shared service to hospitals of Haricomp, Inc. The Center is total supply to all Rhode Island hospitals with the exception of the Newport Naval Hospital. Transfusion demand in 1981 was for 49,224 bloods and 28,883 components. All components were met from Rhode Island resources while collections equaled only 90% requiring contractual support from neighboring ARC Centers.

Lifeblood / Mid-South Regional Blood Center

Lifeblood/Mid-South Regional Blood Center
A nonprofit, tax exempt (501)(c)(3) community service sponsored and endorsed by the Memphis-Shelby County Medical Society and the Memphis Hospital Council. The Corporation has no shareholders. Began operation January, 1974, in a small rented space with four employees. Since January, 1979, housed in a new three-floor, 25,000 square foot custom built facility. Goal for total supply of present service area is 85,000-90,000 donations annually.

LIFELINE
Volunteer Blood Program

West Tennessee Regional Blood Center, Inc.

West Tennessee Regional Blood Center, Inc.
The predecessor, Jackson Blood Bank, was established in 1947 as a partnership venture. In 1972, it was sold to West Tennessee Regional Blood Center, Inc., a nonprofit corporation. FDA license has been continuous since 1949 at which time Jackson Blood Bank became an Institutional Member of AABB. WTRBC draws Blood in three counties on the community-responsibility philosophy and in four counties on the individual responsibility philosophy. The replacement-deposit fee and credit system operate in all counties. At present, WTRBC is providing complete services to twelve hospitals in seven counties and partial service to an additional eleven hospitals in eleven counties. LIFELINE, Volunteer Blood Program is the Blood Assurance Plan operated by WTRBC. In April, 1983 WTRBC moved into a new 13,450 square foot building.

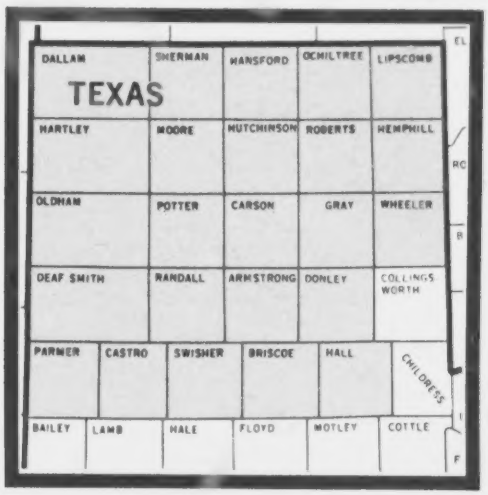
Coffee Memorial Blood Center, Inc.



Coffee Memorial Blood Center, Inc.
Coffee Memorial Blood Center was founded in 1949. From simple beginnings, it has grown to a staff of 24 and services 20 hospitals while drawing 17,000 pints annually in 24 counties. Coffee Memorial is the total supplier for most of the northern Texas panhandle. It offers a full range of component products and a pheresis program to area physicians.

Stewart Blood Center

Stewart Blood Center
Established in 1951 by a gift from W.E. Stewart in memory of his wife, Lela Stewart. The Junior League of Tyler provided volunteer personnel for the Blood Bank that was to supply blood to the two Tyler hospitals. Since that time the hospitals served have grown from two to 42 in a 31-county area, representing a population of one million. Collect 28,600 pints of blood annually.

American Red Cross Blood Services, Tidewater Region

Tidewater Regional Blood Center
The Tidewater Regional Blood Center became the 29th organized Red Cross Blood Center September 15, 1949, through the efforts of Norfolk physician Dr. Southgate Leigh, the program's first director. The Center has grown from service to 19 hospitals and 14 Red Cross Chapters to 57 hospitals and 56 Chapters in 58 counties in eastern Virginia and eastern North Carolina. With its relocation to the present site in September, 1977, the Blood Center increased its blood processing capability by five times. The region has some 1,000 blood collection operations annually and has steadily increased its collections by a minimum of three percent.

Community Blood Bank of Norton, Inc.

Community Blood Bank of Norton, Inc.
The Community Blood Bank of Norton is a nonprofit organization started by the Norton Lions Club, but is self-supporting. Up until 1953 each individual hospital in the area was drawing donors to supply their own needs. A serious mining accident caused the hospitals and persons in the community to realize they needed to have more blood readily available to meet the needs of the community. The Norton Lions Club was actively involved in setting up the Blood Bank's Board of Directors and in purchasing new equipment. The Community Blood Bank was directly involved in the discovery of NOR polyagglutinable antigen in 1979, for which the antigen was named.

Richmond Metropolitan Blood Service

Richmond Metropolitan Blood Service
Richmond Metropolitan Blood Service is a nonprofit community blood program serving the city of Richmond and four surrounding counties. Founded in 1974, the Blood Service operates under the philosophy of community responsibility in its approach to recruiting donors. During fiscal year 1981-82 the number of units of blood collected increased by eighteen percent. Through the use of marketing techniques as a basis for its donor recruitment efforts, not only did collections increase considerably, but also the number of new donor groups doubled as a result of the implementation of sales/marketing procedures.

The blood service moved into a new 16,826 square foot facility in July, 1982. The increasing collections coupled with expanding services demanded a larger, more flexible facility to house the blood service. Employing an "open" design concept, the building's architects brought the outdoors inside with a glass front and a skylight providing natural light for the many trees and plants that enhance the interior design and provide natural barriers between the donor room and the laboratories. Modular furnishings and movable partitions allow for expansion without costly architectural changes. The facility is heated by a passive solar system that was especially designed to meet the temperature requirements for blood collection and processing areas.

Puget Sound Blood Center and Blood Program

Puget Sound Blood Center and Blood Program
Founded as the King County Central Blood Bank, Inc., in 1944 as a nonprofit community blood bank. It was the first blood bank in the country to operate on a totally centralized basis as the sole agency for collecting, processing, crossmatching and distributing blood and blood products to hospitals and patients. The name was changed to Puget Sound Blood Center and Blood Program in 1978 to accommodate the expansion into seven additional counties.
